### About Me

I am a senior Computer Engineering student at Bülent Ecevit University. I have experience in software development using analytical engineering methods. I gained practical experience through internships and technology competitions. My skills include object-oriented programming, database management, and end-to-end application development.

### SKILLS

Object-Oriented Programming: C#

Web Technologies: HTML, CSS, JavaScript

Databases and SQL: MySQL, SQL Server.

Programming Languages: C, C++, PHP

### Experience

KOCAELİ METROPOLITAN MUNICIPALITY / Intern, 07/2025 - 08/2025

Developed a movie search and favorites application individually, incorporating basic CRUD functions.

Gained hands-on experience in relational database fundamentals and SQL query management.

THORNY SKATE (Teknofest) / Young Software Engineer, November 2023 - July 2024

Bülent Ecevit University

Developed and delivered high-quality, optimized C code for the Unmanned Underwater Vehicle, contributing to the project's success and meeting all competition deadlines. Documented software development methodologies in the technical guides supported the team's advancement to the second round and ensured project scalability. Structured problem-solving techniques and innovative solutions were applied in a team environment to ensure the successful integration of software systems.

### Education

Bülent Ecevit University 2022-2026

Computer Engineering

### Language

English: Intermediate (B1)

### Projects

- Survey Upload & QR Converter: A web application was developed that enables uploading surveys and converting them to QR codes.
- Travel Guide (Cityseekrs): A user-friendly website focused on city guides was designed using HTML, CSS, and JavaScript.
- Movie Search App: A personal application was developed that includes CRUD operations and features movie search and adding to favorites.
